Innovation and Transformation for financial aid projects

Project Title	Innovation and Transformation for financial aid projects
Project Summary	FSA will launch its mobile platform, which will allow students and parents to complete and submit the Free Application for Federal Student Aid (FAFSA®) form on a mobile phone. The Next Gen project will transform how we pay for college and we are looking for interns to be a part of the transformation
Country	United States

Project Description

In Innovation and Transformation team is looking for "transformers" to assist with taking an idea from start to finish. This project will review innovative ideas that can make paying for college smoother for students and families. We will use a rapid prototype model and lean start up model to pitch ideas to senior leaders to potentially be executed in the FSA Next Gen environment. We are working at a high pace to get ideas off the ground.

If interested in changing how we pay for college and using technology and the mobile environment to help families then the Next Gen team is the right internship. We need researchers, business development, policy, graphic design, marketing, social media, fintech enthusiast, edtech enthusiast to join our transformers team.

The Next Gen team is looking to bring on interns who can help work with the Innovation team on financial aid enhancements as well as employee ideas that are non-financial aid ideas. We will use rapid prototyping and lean start up model to test ideas to submit to leadership.
